

Thank you for signing up to receive our quarterly e-newsletters! Enjoy our Fall edition and watch for our Winter newsletter in December.

SCARIEST HALLOWEEN HAZARDS

During the week of Halloween, call volumes at Pet Poison Helpline increase significantly, making it consistently one of our busiest weeks of the year. While most of the calls involve dogs of various breeds and sizes, other animals such as cats, ferrets, and pocket pets were also represented.

Remind your clients to keep their pets safe from these common Halloween exposures!

Xylitol Toxicosis in Dogs

As Halloween and Thanksgiving approach we also begin to see an increase in calls to Pet Poison Helpline regarding xylitol exposures. By understanding the benefits and properties of xylitol, you can better predict which products may contain it and, in turn, help predict which of your patients may be at risk for poisoning.
